RE: Consultation on Central Lancashire Local Plan 2023-2041 Regulation 19 Pre-Submission Plan

Thank you for the opportunity to comment on the above document. The following representations are submitted by NHS Property Services (NHSPS).

NHS Property Services

NHS Property Services (NHSPS) manages, maintains and improves NHS properties and facilities, working in partnership with NHS organisations to create safe, efficient, sustainable and modern healthcare environments. We partner with local NHS Integrated Care Boards (ICBs) and wider NHS organisations to help them plan and manage their estates to unlock greater value and ensure every patient can get the care they need in the right place and space for them. NHSPS is part of the NHS and is wholly owned by the Department of Health and Social Care (DHSC) – all surplus funds are reinvested directly into the NHS to tackle the biggest estates challenges including space utilisation, quality, and access with the core objective to enable excellent patient care.

General Comments on Health Infrastructure to Support Housing Growth

The delivery of new and improved healthcare infrastructure is significantly resource intensive. The NHS as a whole is facing significant constraints in terms of the funding needed to deliver healthcare services, and population growth from new housing development adds further pressure to the system. New development should make a proportionate contribution to funding the healthcare needs arising from new development. Health provision is an integral component of sustainable development – access to essential healthcare services promotes good health outcomes and supports the overall social and economic wellbeing of an area.

Residential developments often have very significant impacts in terms of the need for additional primary healthcare provision for future residents. Given health infrastructure's strategic importance to supporting housing growth and sustainable development, it should be considered at the forefront of priorities for infrastructure delivery. The ability to continually review the healthcare estate, optimise land use, and deliver health services from modern facilities is crucial. The health estate must be supported to develop, modernise, or be protected in line with integrated NHS strategies. Planning policies should enable the delivery of essential healthcare infrastructure and be prepared in consultation with the NHS to ensure they help deliver estate transformation.

Detailed Comments on Draft Local Plan Policies

Our detailed comments set out below are focused on ensuring that the needs of the health service are embedded into the Local Plan in a way that supports sustainable growth. When developing any additional guidance to support implementation of Local Plan policies relevant to health, for example in relation to developer contributions or health impact assessments, we would request the Council engage the NHS in the process as early as possible.

Draft Policy HC3 Community, Health and Education Facilities

Draft Policy HC3 sets out how communities should have access to community, health and education facilities. NHSPS supports the provision of sufficient, quality community facilities and does consider the proposed policy approach to be currently sound.

The NHS requires flexibility with regards to the use of its estate to deliver its core objective of enabling excellent patient care and support key healthcare strategies such as the NHS Long Term Plan. In particular, the disposal of sites and properties which are redundant or no longer suitable for healthcare for best value (open market value) is a critical component in helping to fund new or improved services within a local area. Requiring NHS disposal sites to explore the potential for alternative community uses and/or to retain a substantial proportion of community facility provision adds unjustified delay to vital reinvestment in facilities and services for the community.

All NHS land disposals must follow a rigorous process to ensure that levels of healthcare service provision in the locality of disposals are maintained or enhanced, and proceeds from land sales are re-invested in the provision of healthcare services locally and nationally. The decision about whether a property is surplus to NHS requirements is made by local health commissioners and NHS England. Sites can only be disposed of once the operational health requirement has ceased. This does not mean that the healthcare services are no longer needed in the area, rather it means that there are alternative provisions that are being invested in to modernise services.

Draft Policy ID2: Developer Contributions and Planning Obligations

Draft Policy ID2 states that new development will be expected to contribute to mitigating its impact on infrastructure, services and environment and to contribute towards the requirements of the community. As drafted the policy is sound, accounting for healthcare infrastructure needs which arise from housing growth. We request that the Council continue its engagement with the NHS to further refine the identified healthcare needs and proposed solutions to support the level of growth proposed by the Local Plan, as identified in the IDP, prior to submission.

Healthcare providers should have flexibility in determining the most appropriate means of meeting the relevant healthcare needs arising from a new development. Where new developments create a demand for health services that cannot be supported by incremental extension or internal modification of existing facilities, this means the provision of new purpose-built healthcare infrastructure will be required to provide sustainable health services. Options should enable financial contributions, new-on-site healthcare infrastructure, free land/infrastructure/property, or a combination of these. It should be clarified that the NHS and its partners will need to work with the council in the formulation of appropriate mitigation measures.

Conclusion

NHSPS thank Chorley, South Ribble and Preston Council for the opportunity to comment on the . We trust our comments will be taken into consideration, and we look forward to reviewing future

Property Services

iterations of the Plan. Should you have any queries or require any further information, please do not hesitate to contact me.

NHSPS would be grateful to be kept informed of the progression of the Local Plan and any future consultations via our dedicated email address, town.planning@property.nhs.uk.

Yours faithfully,

Daniel Fleet
Town Planner
